

East Medina County SUD

Boil Water Notice for Community Public Water Systems Effective March 5, 2025

As a **precaution, due to low distribution pressure**, the Texas Commission on Environmental Quality has required the **East Medina Count Special Utility District/1630029 (CREEKWOOD SUBDIVISION ONLY)** public water system to notify all customers to boil their water prior to consumption (e.g., washing hands/face, brushing teeth, drinking, etc). Children, seniors, and persons with weakened immune systems are particularly vulnerable to harmful bacteria, and all customers should follow these directions.

To ensure destruction of all harmful bacteria and other microbes, water for drinking, cooking, and ice making should be boiled and cooled prior to use for drinking water or human consumption purposes. The water should be brought to a vigorous rolling boil and then boiled for two minutes.

In lieu of boiling, individuals may purchase bottled water or obtain water from some other suitable source for drinking water or human consumption purposes.

When it is no longer necessary to boil the water, the public water system officials will notify customers that the water is safe for drinking water or human consumption purposes.

Once the boil water notice is no longer in effect, the public water system will issue a notice to customers that rescinds the boil water notice in a manner similar to this notice.

Please share this information with all the other people who drink this water, especially those who may not have received this notice directly (for example, people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.

If you have questions concerning this matter, you may contact **Ronald Lemmons** at **830-302-6239** or **come to the office located at 16313 FM 471 South, Devine, Texas 78016** to request a copy in English or Spanish.

Este del Condado de Medina SUD

Aviso de hervir el agua para los sistemas públicos comunitarios de agua A partir del 5 de marzo de 2025

Como **medida de precaución, debido a la baja presión de distribución**, la Comisión de Calidad Ambiental de Texas ha requerido que el sistema público de **agua del Distrito de Servicios Públicos Especiales del Condado de East Medina/1630029 (CREEKWOOD SUBDIVISION ONLY)** notifique a todos los clientes que hiervan el agua antes de consumirla (por ejemplo, lavarse las manos/cara, cepillarse los dientes, beber, etc.). Los niños, las personas mayores y las personas con sistemas inmunitarios debilitados son particularmente vulnerables a las bacterias dañinas, y todos los clientes deben seguir estas instrucciones.

Para garantizar la destrucción de todas las bacterias dañinas y otros microbios, el agua para beber, cocinar y hacer hielo debe hervirse y enfriarse antes de usarla para beber agua o para el consumo humano. El agua debe hervir vigorosamente y luego hervir durante dos minutos.

En lugar de hervirla, las personas pueden comprar agua embotellada u obtener agua de alguna otra fuente adecuada para fines de agua potable o consumo humano.

Cuando ya no sea necesario hervir el agua, los funcionarios del sistema público de agua notificarán a los clientes que el agua es segura para el agua potable o el consumo humano.

Una vez que el aviso de hervir el agua ya no esté en vigor, el sistema público de agua emitirá un aviso a los clientes que rescindirá el aviso de hervir el agua de una manera similar a este aviso.

Comparta esta información con todas las demás personas que beben esta agua, especialmente con aquellas que pueden no haber recibido este aviso directamente (por ejemplo, personas en apartamentos, hogares de ancianos, escuelas y empresas). Puede hacerlo publicando este aviso en un lugar público o distribuyendo copias en mano o por correo.

Si tiene preguntas sobre este asunto, puede comunicarse con **Ronald Lemmons** al **830-302-6239** o **venir a la oficina ubicada en 16313 FM 471 South, Devine, Texas 78016** para solicitar una copia en inglés o español.
